Saturday, AUGUST 2

U.S. out Of Iraq & Afghanistan

Money for human needs, not war!

An emergency call to action

Yet another U.S. War?

The people of Iraq and Afghanistan hate the U.S. occupation of their countries. These Pentagon wars have no support at home, and are ruining the domestic economy. Instead of pulling out, the Bush administration is preparing for still another war-this time against Iran. This must be stopped!

Aggression towards Iran is escalating

On June 4, George Bush, with Israeli Prime Minister Ehud Olmert at his side, called Iran a "threat to peace." Two days before, acting as a proxy for the Pentagon, Israel used advanced U.S. supplied fighter planes to conduct massive air maneuvers, which the media called a "dress rehearsal" for an attack on Iran's nuclear facility. Under pressure from the U.S., the European Union announced sanctions against Iran on June 23; a bill is before Congress for further U.S. sanctions on Iran and even a blockade of Iran.

Iran "threats" a hoax

Iran as a "nuclear threat" is as much a hoax as Bush's claim of "weapons of mass destruction" in Iraq used to justify the war there. The International Atomic Energy Agency, which inspects Iran's nuclear facilities, says it has no weapons program and is developing nuclear power for the days when its oil runs out. Iran has signed the Nuclear non-proliferation Treaty. Even Washington's 16 top spy agencies issued a joint statement that said Iran does not have nuclear weapons technology!

The U.S. and Israel are the real nuclear danger. The Pentagon has a huge, nuclear-capable naval armada in the

Persian/Arabian Gulf, with guns aimed at Iran. Israel has up to 200 nuclear warheads, and has never signed the non-proliferation treaty.

Israel strike would follow Bush's orders

Israel is the Pentagon's proxy strike force in the Middle East. U.S. tax dollars finance Israel wars against surrounding nations, and Israeli repression of the Palestinians, to keep the area "safe" for U.S. oil companies. No to U.S. war through Israel! Support the Palestinian people's right to return!

War hurts U.S. economy

While billions of dollars go to war, at home the unemployment rate had the biggest spike in 23 years. Home foreclosures and evictions are increasing; fuel and food prices are through the roof. While the situation is growing dire for many, Washington's cuts to domestic programs continue. A new U.S. war will bring only more suffering.

What we do right now can make a difference

The August recess of Congress gives the White House an opportunity for unopposed aggression against Iran. We must not let this happen! We demand "**Stop war on Iran . U.S. out of Iraq and Afghanistan . Support the Palestinian right to Return. Money for human needs, not war!**"

[This call to action is issued by StopWarOnIran.org, a network of thousands of concerned activists and organizations fighting to stop a new war against Iran since March 2006.]
